

Povzetek vsebine:

Obdelane so krivulje s konstantno širino.

Math. Subj. Class. (1991): 52A10

Key words:

convex sets with a constant width, complete sets, curves with a constant width, Reuleaux triangle, Reuleaux polygons, Blaschke - Lebesgue's theorem, Barbier's theorem, isoperimetric theorem, isoperimetric inequality, isoperimetric quotient.
